

Software Developer (Barcelona)

JOB SPECIFICATION

Role Overview

Joining an established and growing team in Barcelona, the Software Developer will be responsible for developing solutions according to provided specifications. Project sizes will range from small tactical engagements to very large Enterprise-level solutions in both small and large teams, across both Barcelona and the UK.

Working very closely within the existing team in Barcelona and with the other Developers, Architects and Project Managers in the UK, our software developers will be involved in leading-edge Microsoft solutions for our valued clients.

Our solutions are focused on the Microsoft Productivity Platform incorporating:

- Office 365
- SharePoint 2010, 2013 and SharePoint Online
- Dynamics CRM
- Custom ASP.NET (C#) Solutions

We put great pride in our employees and clients, and we ensure that we maintain constant contact with everyone in the business. We work hard to provide excellent team communication through regular visits to and from the UK, constant use of Skype for voice calls and Yammer for regular updates.

Reporting To: Head of Technical Delivery

Do you have?

- An overwhelming desire to create the best Business Solutions
- A passion for quality
- Good spoken English (for conversation, not perfect!)
- Self-motivated and team oriented
- Ability to produce high quality solutions based on specifications following best practice
- Ambition and drive to build the practice with no boundaries and to share in its success with the rest of the team
- A desire to grow the team in Barcelona and be part of a great family atmosphere
- The candidate will need to develop and maintain strong working relationships with the following key people;
 - Company Directors
 - Heads of Department (Development, Architecture)
 - Project Managers
 - Project Leads, Architects and Developers
 - Colleagues in Barcelona

Preferred Skills / Experience

- A strong background in .NET, C#, ASP.NET development
- SharePoint 2013 and 2010 experience of major benefit
- SharePoint Installation and configuration both at farm and user level beneficial
- Experience of Team working and task tracking with Microsoft Team Foundation Server
- Experience with WCF Web Services, InfoPath forms
- Third-party Workflow tools (K2, Nintex)
- Windows PowerShell
- Design/UI branding
- Migration experience
- SQL Server 2008 and above
- Office 365 / SharePoint Online experience highly desirable
- Active Directory / ADFS / Exchange / Lync experience

Our Work Environment

Foundation SP is a young business with a great deal of ambition. We collaborate on everything and don't accept mediocrity; there is high expectation for each of our teams to deliver the best possible outcome for our clients. We work in a busy environment where everyone works hard but takes pride in what they do. Foundation SP is a demanding yet very rewarding place to work.
