Solutions Architect

JOB SPECIFICATION

Get in touch | hello@foundation-sp.com

Role Overview

Joining an established and growing team, the Solutions Architect will be responsible for planning designing and delivering SharePoint solutions. The Solutions Architect will engage in the full project life cycle from presales through to operational handover. Project sizes will range from small engagements to very large Enterprise-level SharePoint solutions in both small and large teams.

The Solutions Architect must have User Experience and Design Flair, be able to produce rapid prototypes, proof-of-concepts and wireframes and provide on-site consultancy services to clients and to lead technical workshops. Projects will likely be fast-paced and use an agile methodology for delivery and the Solutions Architect should be able to demonstrate a good eye for detail and the ability to bring to life design concepts and wow clients.

The candidate will be required to demonstrate impeccable leadership qualities and a passion and belief in all work that they do. They must also set an example, display a positive belief in the capabilities of themselves and others and provide inspiration to their peers at all levels within the business. They will also be required to demonstrate continued delivery against the company's values (Excite, Respect, Collaborate, and Deliver).

The role will be a mix of office and client based work, requiring some element of travel.

Reporting To: Head of Technical Delivery
